--> Comment Text :  
My opinion of the Yucca Mountain Project is that it will be a means of the nuclear industry to fool the public into thinking nuclear energy is safe, and there will be a resumption of building nuclear plants. This is dangerous and foolish. We have already produced enough nuclear waste to keep officials busy monitoring it for generations. We must stop thinking in terms of growth, and focus on conservation and renewable energy sources. Our lives and our survival demand it.
